5. Basic SQL Queries

You are given a database table named Users with columns *UserID*, *Username*, *Password*, *Email*, and *CreatedDate*.

Write SQL queries to:

1.   Retrieve all user records.

2.   Update the email address of a specific user

3.   Delete the specific user

Answers

1. SELECT * FROM Users;

2. (Assume Specific user ID = 101;)

    UPDATE Users
    SET Email = 'thushani@example.com'
    WHERE UserID = 101;

3. (Assume Specific user ID = 101;)

    DELETE FROM Users
    WHERE UserID = 101;
